Driving a car in winter requires skill, and this is why everybody needs the practice. And There is nothing mystical about driving under slippery conditions. The laws of physics govern the movement of the car and you just have to learn to cope with these laws. The same holds true in summer, and things you have picked up under winter conditions may prove extremely useful at a later stage. The best way to learn all this is to do it with Porsche!

Porsche is proud of using an exclusive location close to Rovaniemi. A team of highly professional specialists are preparing the driving sections. The day consists of the following tasks in groups of 8-10 participants. Each group will be guided by 1 Porsche instructor and 1 Porsche hostess

Upon entering the log house you “forgot” the time and place, as this is a whole new world for you. Here you can relax, calm your mind and absorb a true piece of authentic Lappish nature with its’ pond, spruces, purling sound of brook and sounds of nature.

The dinner is served around the pond by the glow of burning firewood and candles. Dessert is served by a wooden boat emerging from the blue mist, and the host of Santamus can entertain during the evening with playing “kantele” – the Finnish national string instrument.
